

How does Natama applicants' training and evaluation in English work?

We care about children, so we support parents!

We train and evaluate future parents for children who need safe and loving family.

Our program is based on science, good practice of services in the UK, USA, and 20 years of our experience in the CR.

You will learn what you will in deed need!

1. Our training and evaluation are intensive, comprehensive, and interlinked programs
2. You will do a total of 42 training hours within one week in a small international group of applicants
3. You will get a WORK BOOK in English
4. You will do 6-8 hours of individual sessions
5. You will do psychological testing in English
6. At the end of this process you will learn about the results
7. Then we send the FINAL REPORT with recommendations to the Prague Magistrate
8. Then the Prague Magistrate makes the final decision
